

GermZapper OZ-300™

UVC HANDHELD DISINFECTION DEVICE

GermZapper OZ-300 (+ ozone) is a handheld, portable germicidal UVC disinfection device designed to deactivate bacteria, viruses and fungi on surfaces where chemical sprays aren't appropriate and strong enough to disinfect a 645 sqft room in 3 minutes. GermZapper OZ-300™ offers a ozone generating germicidal lamp that helps eradicate foul odor and harmful volatile organic compounds (VOCs) such as sulfides, mercaptans and ammonia. One distinct advantage of ozone is that it can be carried in the air to places where direct UV radiation cannot reach, optimizing its germ killing efficiency as a UV air purification system, providing an additional deodorizing effect.

Product data

General information	
Name	GermZapper OZ-300™
Type	+Ozone
Designated Usage	Disinfection & air purification cleaning of surfaces & spaces
Remarks	Warnings and Safety: A lamp breaking is extremely unlikely to have any impact on your health. If a lamp breaks, ventilate the room for 30 minutes and remove the parts, preferably with gloves. Put them in a sealed plastic bag and take it to your local waste facilities for recycling. Do not use a vacuum cleaner. DANGER: Risk Group 3 Ultra Violet product. These lamps emit high-power UV radiation that can cause severe injury to skin and eyes. Avoid eye and skin exposure to unshielded product. Use only in an enclosed environment which shields users from the radiation.

Dimensions	
Length	21 in
Width	7 in
Height	7.5 in
Lamp	
Type	Quartz Tube + Solid Mercury
Power	300 W
Lifetime	20,000 hours
UV-C Wavelength	253.7 nm + 185nm with Ozone
Light Intensity	2100uw/cm² at 50cm
Disinfection area	645 -2150 sqft
Working temperature	-20-45°C
Power	
Input	100-240 V, AC 50-60 Hz

Warning

The lamps emit high-power UVC light and ozone that can cause respiratory problems & injury to skin and eyes. Keep ventilation for 30 minutes after usage. Always wear respirator mask and colored eye shield. Never touch or look directly into the light.
